Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4-5, 7, 11-15, 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moyer (5794773) in view of Pflueger et al (6123198).

With regard to claims 1, 4-5, 7, 11-15 and 21-26, Moyer discloses a device (figs. 1 and 3) comprising a base (12) forming at least partially of foam (28), a cover (14) forming at least partially of foam (30), a hinge (24) being formed at least partially of foam (col. 3, lines 20-22), the hinge integrally connecting the base and the cover, a plurality of recesses (32, 42) being formed in at least the base and the cover, a covering material being made of different material than foam covering at least a portion of the base, the cover and the hinge (col. 2, lines 66-67 and col. 3, line 1); the base and the cover each having a snap (18) located thereon. Moyer does not disclose a cosmetic composition contained in the recess of the base and the cosmetic composition having a cosmetic substance contained within a tray such edges of the at least one of recess contact edges of the tray. Pflueger et al discloses a cosmetic container (fig. 2) comprising a foam core (14, at least one recess (38) formed in the foam core, a

cosmetic composition (lipstick 52) contained in the recess (42) of the foam core and a covering material (22) covering at least a portion of the foam core and defining an exterior surface of the cosmetic product, the covering material being made of vinyl (col. 3, line 42; the cosmetic composition having a cosmetic substance contained within a tray (it is noted that lipstick substance contained within a tray or tube). It would have been obvious to one skill in the art at the time the invention was made to employ the cosmetic composition being hold a foam recess as taught in Pflueger et al into the device of Moyer for the purpose of providing an effective and convenient way of holding the cosmetic products.

Claims 8-9 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moyer in view of Pflueger et al.

With regard to claims 8-9 and 19-29, Moyer in view of Pflueger et al disclose a cosmetic product comprising all the claimed limitations as discussed above in claims 1 and 4 except for the material of the cover being Lycra or fabric. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the material of the cover being Lycra or fabric, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Art Unit: 3732

Claims 10 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moyer in view of Pflueger et al as applied to claims 1 and 4 above, and further in view of Skarne.

With regard to claims 10 and 16-18, Moyer in view of Pflueger et al disclose a cosmetic product in claims 1 and 4 as discussed above except for a mirror being in the recess and the foam edges surrounding the mirror and the material of the cover being Lycra. Skarne discloses a cosmetic compact (figs. 2-3) comprising a base (28) and a cover (26) forming at least partially of foam (col. 2, lines 1-12), a hinge (30) connecting the base and the cover and at least one recess (54) forming in the base and the recess containing a cosmetic composition, the compact further having a mirror (22) and a recess (50) in the cover containing and surrounding edges of the mirror (fig. 3). It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the mirror as taught by Skarne into the cosmetic product of Moyer in view of Pflueger et al for the makeup purpose and it would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the material of the cover being Lycra, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moyer in view of Pflueger et al as applied to claims 1 and 4 above, and further in view of Gueret.

With regard to claims 3 and 6, Moyer in view of Pflueger et al disclose a cosmetic product in claims 1 and 4 as discussed above except for the cosmetic composition being directly deposited in the at least one recess. Gueret discloses a cosmetic compact (fig. 2) comprising a base (5), a cover (2), the base having at least one recess (11c) wherein the cosmetic composition (8) being directly deposited in the recess. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to deposit the cosmetic composition directly in the recess as taught by Gueret into the compact of Moyer in view of Pflueger et al for the intended use purpose.
